20a. How does the Committee accomplish its purpose?

Once appointed, the United States Manufacturing Council (USMC or Council) will serve as the premier national advisory committee on manufacturing. The objectives and duties of the Council are to identify and recommend ways to ensure that the Government responds to the challenges facing United States manufacturers and ways that United States manufacturers can ensure their continued competitiveness both at home and abroad. The Council is to advise the Secretary on government policies and programs that affect United States manufacturing and provides a forum for discussing and proposing solutions to industry-related problems. The Council acts as a liaison among the stakeholders

represented by the membership and may provide a forum for those stakeholders on current and emerging issues in the manufacturing sector.

20b. How does the Committee balance its membership?

Currently, the Council holds no membership. However, the Council's membership will reflect the diversity of U.S. manufacturing by representing a balanced cross-section of United States manufacturing industry sectors, including entities from various geographic locations and businesses of varying size, particularly small and medium-sized enterprises.

20c. How frequent and relevant are the Committee Meetings?

Estimated Number of Meetings per Year: 8. The meetings address issues that continually affect the U.S. manufacturing industry as well as issues that have newly arisen. Council recommendations are considered by an interagency review upon being adopted and feedback is provided to the Council to use in their subsequent work. The Council completes its work in working groups called subcommittees that are not separately chartered and that refer and convey work through the full Council. They meet via call or in-person immediately prior to the Council meetings. There are no members of subcommittees that are not members of the Council. These subcommittee work sessions do not incur cost separate of that to run the Council and to staff the official meetings.

20d. Why can't the advice or information this committee provides be obtained elsewhere?

The Council is essential to ensure that the United States manufacturers can ensure their continued competitiveness both at home and abroad. There

are no other committees that can fulfill this function.

20e. Why is it necessary to close and/or partially closed committee meetings?

All meetings are open to the public.

21. Remarks

Due to a variety of factors affecting the continuance of political leadership of the USMC, the Council held no meetings during the current charter and recruited no members. However, the current Deputy Assistant Secretary for Manufacturing has emphasized the importance of this Council and has committed resources to recruit and establish an active Council for the upcoming charter period.

Designated Federal Officer

Jaron Bass Designated Federal Officer

Narrative Description

The Manufacturing Council serves as the principal private sector advisory committee to the Secretary of Commerce on the United States manufacturing sector. The Council is charged with ensuring regular communication between the federal government and the manufacturing sector, advising the Secretary of Commerce on government policies and programs that affect United States manufacturing and provide a forum for discussing and proposing solutions to industry-related problems and to ensure that the United States remains the preeminent destination for investment in manufacturing throughout the world.
