20a. How does the Committee accomplish its purpose?

The committee is composed of recognized biomedical and/or behavioral research authorities who represent the forefront of research and have technical knowledge to provide first-level scientific and technical merit evaluation of research grant applications in the areas of carcinogenesis, cancer biology, cancer center administration, radiological and surgical oncology, cancer chemotherapy, cancer clinical trials, cancer epidemiology, cancer prevention and therapy, cancer control, cancer diagnosis, training of clinician scientists, education of health and population science professionals, development of cancer instruction curriculum, patient-oriented research, and career development of basic and clinician scientists in disciplines of relevance to cancer. In FY 2023, the committee met 12 times, and reviewed a total of 667 applications requesting a total of \$212,227,151.00 in direct costs for the first year. This is a very substantial portion of the NCI extramural research budget. The committee also sponsored 15 site visits by work group panels, which then reported back to the committee about the details of the large multicomponent applications under review. The success of the committee is illustrated by its accomplishments in FY 2023.

20b. How does the Committee balance its membership?

The members of committee are authorities who are knowledgeable in the areas of carcinogenesis, cancer biology, cancer center administration, radiological and surgical oncology, cancer chemotherapy, cancer clinical trials, cancer epidemiology, cancer prevention and therapy, cancer control, cancer diagnosis, training of clinician scientists, education of health and population science professionals, development of cancer instruction curriculum, patient-oriented research, and career development of basic and clinician scientists in disciplines of relevance to cancer.

20c. How frequent and relevant are the Committee Meetings?

The committee met 12 times during this reporting period. Work group meetings were conducted on the following dates: 10/5-7/22; 10/11-13/22; 10/12-14/22; 10/26-28/22; 01/25-27/2023; 03/1-3/23; 04/25-27/23; 05/3-5/23; 05/15-17/23; 05/24-26/23; 08/23-25/23; 08/30-09/1/23; 09/11-13/23; 09/18-20/23; 09/20-22/23 (15 Meetings).

20d. Why can't the advice or information this committee provides be obtained elsewhere?

The committee's review of all NCI designated Cancer Centers, career development, training and population and patient-oriented training applications provides uniformity in compliance with the appropriate guidelines and consistency in scientific evaluation of each type of grant applications. These evaluations and recommendations cannot be obtained from other sources because the complex nature of the grant applications and the rapid pace of scientific

progress in the fields require a unique balance and breadth of expertise not available at the NIH or from other established sources.

20e. Why is it necessary to close and/or partially closed committee meetings?

The meetings of the committee were closed to the public for the review of grant applications. Sections 552b(c)(4) and 552b(c)(6) of the Government in the Sunshine Act permit the closing of meetings where discussion could reveal confidential trade secrets or commercial property such as patentable material and personal information, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

21. Remarks

Reports: This committee did not produce any public reports. Members: Maria Avantaggiati was reassigned as Chair. As such their designation as a member was changed to Chair. Andrew Dudley and Michael Nishimura were reappointed as Chair. As such, their term of service end date is different than what was reported on the FY22 ACR. The terms for Doris Benbrook, Jeremy Edwards, Soledad Fernandez, Aimee James, Addanki Kumar, Primo Lara, Kay Macleod, Meghan McGrady, Dinesh Rao, Lori Rink, David Tran, and Muhammad Raza Zaidi changed due to their reappointments. As such, their term of service end date is different than what was reported on the FY22 ACR. The term of service start and end date for Aysegul Sahin were inadvertently reported incorrectly on the FY22 ACR, as such the term of service start date is different than what was reported on the FY22 ACR. Given his reappointment, the term of service end date is different than what was reported on

the FY22 ACR as well. In general, initial/integrated review group (IRG) members serve up to six years, which is documented in the Members list. The permanent membership of this IRG may be supplemented at any meeting with temporary members who have experience or expertise in the disciplines and fields related to the IRG's function and are appointed to review some or all of the applications considered at that meeting. Therefore, the Members list reflects meeting dates, not appointment start and end dates for these members. While only one meeting date is listed as an appointment start and end date, an IRG temporary member may have attended several meetings throughout the fiscal year. Meeting rosters, including members' affiliations and zip codes are available online at <https://public.era.nih.gov/pubroster/>. The DFO and Committee Decision Maker positions are held by the same individual because of the assignment of responsibilities within the Institute.

Designated Federal Officer

Shamala K. Srinivas Associate Director, Office of Referral, Review and Program Coordination

Number of Committee Members Listed: 214

Narrative Description

NIH's mission is to seek fundamental knowledge about the nature and behavior of living systems and the application of that knowledge to enhance health, lengthen life, and reduce illness and disability. NIH works toward that mission by supporting the research of non-Federal scientists in universities, medical schools, hospitals, and research institutions throughout the country and abroad. Section 492 of the PHS Act states that The Secretary...shall by regulation require appropriate technical and

scientific peer review of -- (A) applications...; and (B) biomedical and behavioral research and development contracts... The National Cancer Institute (NCI) is a component of the National Institutes of Health (NIH), one of eight agencies that compose the Public Health Service (PHS) in the Department of Health and Human Services (DHHS). The National Cancer Institute coordinates the National Cancer Program, which conducts and supports research, training, health information dissemination, and other programs with respect to the cause, diagnosis, prevention, and treatment of cancer, rehabilitation from cancer, and the continuing care of cancer patients and the families of cancer patients. The mission of the committee (Initial Review Group) is to advise the Director of the National Cancer Institute and the Director of the Division of Extramural Activities, NCI, about the scientific and technical merit of research-related grants and cooperative agreements, and contract proposals, research training, and career development. The scientific areas considered in the committee include carcinogenesis, cancer biology, cancer center administration, radiological and surgical oncology, cancer chemotherapy, cancer clinical trials, cancer epidemiology, cancer prevention and therapy, cancer control, cancer diagnosis, training of clinician scientists, education of health and population science professionals, development of cancer instruction curriculum, patient- oriented research, and career development of basic and clinician scientists in disciplines of relevance to the cancer. The mission of the committee is accomplished with its composition of recognized experts in biomedical and behavioral areas who represent the forefront of research, have technical knowledge relating to cancer and ensure fair, equitable, and unbiased evaluation. It provides first-level scientific and technical merit evaluation of applications for grants including applications for individual investigator-initiated research projects; multi- component research programs such as applications submitted for Cancer Center Support Grant, institutional cancer training and education programs, and individual career development awards to reduce the morbidity and mortality from cancer. The grant applications address all aspects of basic, translational, and clinical research, as well as career development, training and population and patient-oriented training relevant to the cause, diagnosis, prevention, and treatment of cancer. The effort of

the committee therefore helps to fund and maintain high-quality cancer research and research infrastructure in the United States and also facilitates training of new scientists and clinicians at various stages of their careers in cancer research. Several pilot studies to determine ways to save tax dollars in the operation of the committee have been implemented. These include, the use of electronic media to send review related materials including grant applications to committee members, the use of streamlined review procedures to reduce the number of meeting days required, and the use of teleconference calls or other technology to eliminate travel expenses for some committee members. Additionally, committee members are using the Internet Assisted Review application within the NIH Commons site to access applications and other review related materials electronically. The main goal of the committee is to maintain the current high quality of peer review in order to identify the most meritorious applications for research, research infrastructure and research training in the areas of prevention, detection, diagnosis, and therapy of various cancers. Management of the committee will continue to incorporate technological advances to facilitate the committee members to evaluate the scientific and technical merit of the applications more efficiently.

What are the most significant program outcomes associated with this committee?

Checked if
Applies

Improvements to health or safety	<input type="checkbox"/>
Trust in government	<input type="checkbox"/>
Major policy changes	<input type="checkbox"/>
Advance in scientific research	<input checked="" type="checkbox"/>
Effective grant making	<input checked="" type="checkbox"/>
Improved service delivery	<input type="checkbox"/>
Increased customer satisfaction	<input type="checkbox"/>
Implementation of laws or regulatory requirements	<input type="checkbox"/>
Other	<input type="checkbox"/>

Outcome Comments

N/A

What are the cost savings associated with this committee?

Checked if Applies

None	<input checked="" type="checkbox"/>
Unable to Determine	<input type="checkbox"/>
Under \$100,000	<input type="checkbox"/>
\$100,000 - \$500,000	<input type="checkbox"/>
\$500,001 - \$1,000,000	<input type="checkbox"/>
\$1,000,001 - \$5,000,000	<input type="checkbox"/>
\$5,000,001 - \$10,000,000	<input type="checkbox"/>
Over \$10,000,000	<input type="checkbox"/>
Cost Savings Other	<input type="checkbox"/>

Cost Savings Comments

NIH supported basic and clinical research accomplishments often take many years to unfold into new diagnostic tests and new ways to treat and prevent diseases.

What is the approximate Number of recommendations produced by this committee for the life of the committee?

16,053

Number of Recommendations Comments

Grant Review

What is the approximate Percentage of these recommendations that have been or will be Fully implemented by the agency?

0%

% of Recommendations Fully Implemented Comments

Information on the research funded by NIH is available through the RePORT (Research Portfolio Online Reporting Tool) website. RePORT provides access to reports, data, and analyses of NIH research activities that advance the mission of the NIH, including information on NIH expenditures, strategic plans, reports on NIH funding, and reports on the organization and people involved in NIH research and research training. The RePORT website is located at <http://report.nih.gov>.

What is the approximate Percentage of these recommendations that have been or will be Partially implemented by the agency?

0%

% of Recommendations Partially Implemented Comments

Information on the research funded by NIH is available through the RePORT (Research Portfolio Online Reporting Tool) website. RePORT provides access to reports, data, and analyses of NIH research activities that advance the mission of the NIH, including information on NIH expenditures, strategic plans, reports on NIH funding, and reports on the organization and people involved in NIH research and research training. The RePORT website is located at <http://report.nih.gov>.

Does the agency provide the committee with feedback regarding actions taken to implement recommendations or advice offered?

Yes ☒ No ☐ Not Applicable ☐

Agency Feedback Comments

Information resulting from closed initial peer review meetings is subject to the Freedom of Information Act. The public can view information on research projects funded by NIH on the RePORT (Research Portfolio Online Reporting Tool) website located at <http://report.nih.gov>.

What other actions has the agency taken as a result of the committee's advice or recommendation?

Checked if Applies

Reorganized Priorities	<input type="checkbox"/>
Reallocated resources	<input type="checkbox"/>
Issued new regulation	<input type="checkbox"/>
Proposed legislation	<input type="checkbox"/>
Approved grants or other payments	<input checked="" type="checkbox"/>
Other	<input type="checkbox"/>

Action Comments

An action of approved or recommended for grants receiving initial peer review by this committee does not infer that the grant will be or has been funded. Research grant applications submitted to NIH must go through a two-step review process that includes the initial peer review for scientific and technical merit and a second step of review and approval by a National Advisory Council for program relevance. In addition, prior to an award or funding being made, NIH staff must conduct an administrative review for a number of other considerations. These include alignment with NIH's funding principles, review of the project budget, assessment of the applicant's management systems,

determination of applicant eligibility, and compliance with public policy requirements. After all these steps have been completed, NIH officials make funding decisions on individual grant applications.

Is the Committee engaged in the review of applications for grants?

Yes

What is the estimated Number of grants reviewed for approval 667

What is the estimated Number of grants recommended for approval 667

What is the estimated Dollar Value of grants recommended for approval \$212,227,151
