**20a. How does the Committee accomplish its purpose?**

The THLPSSC is a statutorily mandated advisory committee that advises PHMSA on proposed standards for hazardous liquid pipelines and facilities. The committee reviews each proposal to determine the technical feasibility, cost effectiveness, reasonableness, and practicability of each proposal. The committee also reviews matters relating to risk assessment. The members provide valuable technical knowledge and practical experience to supplement staff resources at relatively low cost. Since it is composed of government, industry, and public members, the

committee serves as a unique forum for give and take, facilitating discussion of complex and often controversial issues. The balance of views on the Committee aids the Office of Pipeline Safety in evaluating conflicting demands placed on us by NTSB, GAO, Congress, and other external stakeholders.

**20b. How does the Committee balance its membership?**

The membership of the Committee represents a unique mix of government, industry and public members. This balance of views reflects varying interests in pipeline safety. The Committee provides a valuable, independent base of technical knowledge and practical experience.

**20c. How frequent and relevant are the Committee Meetings?**

The Committee generally meets at least twice each calendar year.

**20d. Why can't the advice or information this committee provides be obtained elsewhere?**

The Committee brings together experts with technical knowledge and practical experience who represent all constituent groups (government, industry, public) having an interest in pipeline safety. Frank and open discussion of proposed hazardous liquid pipeline safety standards by these experts is both economical and productive. The result is a stronger pipeline safety program. No other readily available source of similar expertise exists within government or industry.

**20e. Why is it necessary to close and/or partially closed committee meetings?**

N/A

## 21. Remarks

The committee is continuing under current legislation.

### Designated Federal Officer

Alan K. Mayberry Associate Administrator for  
Pipeline Safety, Pipeline and Hazardous Materials  
Safety Administration

### Narrative Description

The committee considers each proposed pipeline safety rule to assure technical feasibility, reasonableness, cost-effectiveness and practicability of proposed standards. The members also review and evaluate each associated cost-benefit analysis and risk assessment. Meetings only occur when there is a liquid pipeline rule making that need to be reviewed. There was one meeting in FY22. The committee met virtually on August 17, 2022, to discuss the Coastal Ecological Unusually Sensitive Areas interim final rule that was published on 12/27/22 on the Federal Register. All documents on the meeting are publicly available at the meeting webpage  
(<https://primis.phmsa.dot.gov/meetings/MtgHome.mtg?mtg=160>)  
and at <http://www.regulations.gov> using docket number PHMSA-2022-0077.
