19. Federal Staff Support Years (FTE)	0.00 0.00

20a. How does the Committee accomplish its purpose?

This Council is composed of both scientific and public members who provide the second level of peer review, advise on policy development, program implementation and evaluation, and research needs and opportunities of the Institute. The National Advisory Eye Council reviewed 2455 applications requesting \$4,580,074,707.00. The Council advised the Institute on policy development, program implementation, and research needs.

20b. How does the Committee balance its membership?

The Council will consist of not more than 18 members appointed by the Secretary (appointed members) and at least 5 nonvoting ex officio members. The nonvoting ex officio members will

include the Secretary; the Director, NIH; the Director, NEI; the Under Secretary for Health of the Department of Veterans Affairs; the Assistant Secretary of Defense for Health Affairs (or their designees); and any additional officers or employees of the United States as the Secretary determines necessary for the Council to effectively carry out its functions. Appointed members must be eligible to serve as Special Government Employees (SGEs) and will serve as SGEs, as defined by 18 U.S.C. § 202. Two-thirds of the appointed members will be selected from among the leading representatives of the health and scientific disciplines (including not less than individuals who are leaders in the fields of public health and the behavioral or social sciences) relevant to the activities and mission of the NEI. These include basic, translational, and clinical research to understand the eye and visual system, prevent and treat vision diseases, expand opportunities for people who are blind or require vision rehabilitation, and eliminate vision loss and improve quality of life. One-third of the appointed members will be appointed by the Secretary from the general public and will include leaders in the fields of public policy, law, health policy, economics, and management.

20c. How frequent and relevant are the Committee Meetings?

Meetings are held not less than three times each fiscal year. There were three meetings held in FY23. The National Advisory Eye Council (NAEC) provides advice on a continuing basis on the scientific research program that should be supported and how best to carry out the designated mission and responsibilities of the Institute. It also provides ongoing review of the relevance and effectiveness of the existing

20d. Why can't the advice or information this committee provides be obtained elsewhere?

The National Advisory Eye Council is composed of both scientific and public members who provide the second level of peer review for research grant applications; advise on policy development, program implementation and evaluation; and identify research needs and opportunities of the Institute. The quality, scope, and balance of advice from the NAEC cannot be obtained from NIH staff or from other established sources because the Council is constituted to meet the specific requirements of the mandated mission of the NAEC and of the Institute.

20e. Why is it necessary to close and/or partially closed committee meetings?

National Advisory Eye Council meetings were partially closed to the public for the review of grant applications. Sections 552b(c)(4) and 552b(c)(6) of the Government in the Sunshine Act permit the closing of meetings where discussion could reveal confidential trade secrets or commercial property such as patentable materials and personal information, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

21. Remarks

Committee Function: Other - National Scientific and Advisory. Reports: This committee did not produce any public reports during the fiscal year. The Charter allows the Committee to have 23 authorized members including but not limited to SGEs and Ex-Officios. The Charter authorizes five Ex-Officios (Secretary Becerra, Dr. Chiang, Dr. Tabak, and two vacancies for the VA and DOD)

which equals to the total of 23 Max number of members. Dr. Lawrence Tabak's title was updated from Performing the Duties of the NIH Director to Acting Director, NIH this fiscal year. Dr. Michael Chiang was reappointed as chair through 11/30/2024. Drs. Hartnett, Teller, and Del Rio-Tsonis were administratively extended to May 29, 2023 until their replacements could be approved.

Tabak, Lawrence	12/20/2021	01/20/2025	Acting Director, NIH	Ex Officio Member

Number of Committee Members Listed: 15

Narrative Description

NIH's mission is to seek fundamental knowledge about the nature and behavior of living systems and the application of that knowledge to enhance health, lengthen life, and reduce illness and disability. NIH works toward that mission by: conducting research in its own laboratories; supporting the research of non-Federal scientists in universities, medical schools, hospitals, and research institutions throughout the country and abroad; helping in the training of research investigators; and fostering communication of medical and health sciences information. Section 492 of the Public Health Service Act states that "The Secretary...shall by regulation require appropriate technical and scientific peer review of (A) applications...; and (B...biomedical and behavioral research and

development contracts..."The National Advisory Eye Council provides second level peer review, makes recommendations for support of grants, contracts proposals, and cooperative agreements; advises on policy development, program implementation and evaluation; and research needs of the National Eye Institute.

What are the most significant program outcomes associated with this committee?

	Checked if
	Applies
Improvements to health or safety	✓
Trust in government	
Major policy changes	
Advance in scientific research	~
Effective grant making	✓
Improved service delivery	
Increased customer satisfaction	
Implementation of laws or regulatory

Cost Savings Other	

Cost Savings Comments

NIH supported basic and clinical research accomplishments often take many years to unfold into new diagnostic tests and new ways to treat and prevent diseases.

What is the approximate <u>Number</u> of recommendations produced by this committee for the life of the committee?

42,743

Number of Recommendations Comments

Includes review of research grant applications.

What is the approximate <u>Percentage</u> of these recommendations that have been or will be <u>Fully</u> implemented by the agency?

0%

% of Recommendations Fully Implemented Comments

Information on the research funded by NIH is available through the RePORT (Research Portfolio Online Reporting Tool) website. RePORT provides access to reports, data, and analyses of NIH research activities that advance the mission of the NIH, including information on NIH expenditures, strategic plans, reports on NIH funding, and reports on the organizations and people involved in NIH research and research training. The RePORT website is located at http://report.nih.gov.

What is the approximate <u>Percentage</u> of these recommendations that have been or will be <u>Partially</u> implemented by the agency?

0%

% of Recommendations Partially Implemented Comments

Information on the research funded by NIH is available through the RePORT (Research Portfolio Online Reporting Tool) website. RePORT provides access to reports, data, and analyses of NIH research activities that advance the mission of the NIH, including information on NIH expenditures, strategic plans, reports on NIH funding, and reports on the organizations and people involved in NIH research and research training. Does the agency provide the committee with feedback regarding actions taken to
implement recommendations or advice offered?

Yes	✓	No	Not Applicable
Yes	Υ.	No ·	Not Applicable

Information is provided to the public at the open session of each Council meeting through reports and the Director's update. The public can view information related to the Council through the council's official website.

What other actions has the agency taken as a result of the committee's advice or recommendation?

	Checked if Applies
Reorganized Priorities	✓
Reallocated resources	√
ssued new regulation	
Proposed legislation	
Approved grants or other payments	✓
Other	✓

Action Comments

An action of 'approved' or 'recommended' for grants receiving review by this Council does not infer that the grant will be or has been funded. Research grant applications submitted to NIH must go through a two-step review process that includes the initial peer review for scientific and technical merit and a second step of review and approval by a National Advisory Council that includes program relevance. In addition, prior to an award or funding being made, NIH staff must conduct an administrative review for a number of other considerations. These include alignment with NIH's funding principles, review of the project budget, assessment of the applicant's management systems, determination of applicant eligibility, and compliance with public policy requirements. After all these steps have been completed, NIH officials make funding decisions on individual grant applications.

Is the Committee engaged in the review of applications for grants?

Yes

What is the estimated **Number** of grants reviewed for approval

What is the estimated **Number** of grants recommended for 2,455

approval 2,455

What is the estimated **Dollar Value** of grants recommended for approval

\$4,580,074,707
