20a. How does the Committee accomplish its purpose?

The Klamath Fishery Management Council (KFMC) fulfills its purpose under the Klamath River Basin Fishery Resources Restoration Act by making salmon harvest recommendations to the Pacific Fishery Management Council, Oregon Department of Fish and Wildlife, California Fish

and Game Commission, Bureau of Indian Affairs, Yurok Tribal Council and/or Hoopa Valley Tribal Council. Each year the KFMC's Technical Advisory Team assembles fishery data and prepares technical reports that are provided to both the KFMC and the Pacific Fishery Management Council. The KFMC reviews the technical data, negotiates a fishery management package that satisfies all of its members, and approves it by consensus. It then recommends this management package to the above-mentioned agencies.

20b. How does the Committee balance its membership?

The 11 members represent ocean commercial fishing, ocean recreational fishing, in-river recreational fishing, two tribal fishing groups, two federal agencies, and two state agencies (from Oregon and California). Membership is established by law.

20c. How frequent and relevant are the Committee Meetings?

Meetings are held four times per year, or on an as needed basis. The meetings are held at important points in the annual cycle of salmon management. A fall meeting is held during the fall salmon run. A February meeting coincides with the announcement of salmon population projections for the upcoming year. March and April meetings are held in conjunction with meetings of the Pacific Fishery Management Council in order to participate in planning salmon harvest management for the upcoming fishing season.

20d. Why can't the advice or information this committee provides be obtained elsewhere?

The KFMC is considered uniquely knowledgeable

on Klamath issues. It is the only forum that brings together stakeholders, agencies, and interested parties to focus on the harvest management of Klamath anadromous fish. The Klamath River Basin Fishery Resources Restoration Act directs that the Klamath Fishery Management Council advise on harvest management issues affecting anadromous fish of the Klamath River Basin.

20e. Why is it necessary to close and/or partially closed committee meetings?

All meetings are open to the public

21. Remarks

Narrative Description

Composition of the The Klamath Fishery Management Council (KFMC) is an 11-member federal advisory committee that brings together commercial and recreational fishermen, Native American tribes, and state and federal agencies to work by consensus to manage harvests and ensure continued viable populations of anadromous fish in the Klamath Basin. This program is implemented by the Secretary of the Interior to restore anadromous fisheries of the Klamath River Basin.

What are the most significant program outcomes associated with this committee?

	Checked if	
	Applies	
Improvements to health or safety		
Trust in government		✓
Major policy changes		✓
Advance in scientific research		✓
Effective grant making		
Improved service delivery		
Increased customer satisfaction		
Implementation of laws or regulatory		
requirements		
Other		

Outcome Comments

The KFMC provides management recommendations specifically designed to protect and enhance Klamath Basin salmon populations through the development of fishery harvest models specific to Basin populations and by collating information on Klamath Basin fish stocks as input to those harvest models.

What are the cost savings associated with this committee?	
	Checked if Applies
None	
Unable to Determine	✓

Under \$100,000	
\$100,000 - \$500,000	
\$500,001 - \$1,000,000	
\$1,000,001 - \$5,000,000	
\$5,000,001 - \$10,000,000	
Over \$10,000,000	
Cost Savings Other	

Cost Savings Comments

The KFMC recommendations for Klamath Basin salmon management are intergrated by the Federal (Pacific Fishery Mangagement Council, and National Marine Fisheries Service) State (Calfironia and Oregon), and Tribal (Yurok and Hoopa Valley Tribes) co-managers into ocean harvest management regulations that affect a large number of salmon stocks from all coastal river systems.

What is the approximate $\underline{\text{Number}}$ of recommendations produced by this committee for the life of the committee?

60

Number of Recommendations Comments

The KFMC provides a formal recommendation report to the salmon fishery co-managers twice a year during meetings of the Pacific Fishery Management Counci, which is the forum that brings together all salmon fishery co-managers. Each report may contain from 1-8 specific items related to salmon harvest management as it relates to Klamath Basin fish.

What is the approximate <u>Percentage</u> of these recommendations that have been or will be <u>Fully</u> implemented by the agency?

90%

% of Recommendations Fully Implemented Comments

DOI does not have direct fishery harvest management authority for anadromous salmon. The KFMC provides recommendations to the Federal (Pacific Fishery Mangagement Council, and National Marine Fisheries Service) State (California and Oregon), and Tribal (Yurok and Hoopa Valley Tribes)governments and agencies that have that authority.

What is the approximate <u>Percentage</u> of these recommendations that have been or will be <u>Partially</u> implemented by the agency?

% of Recommendations Partially Implemented Comments DOI does not have direct fishery harvest management authority for anadromous salmon. The KFMC provides recommendations to the Federal (Pacific Fishery Mangagement Council, and National Marine Fisheries Service) State (Calfironia and Oregon), and Tribal (Yurok and Hoopa Valley Tribes)governments and agencies that have that authority. Does the agency provide the committee with feedback regarding actions taken to implement recommendations or advice offered? Yes 🗸

Agency Feedback Comments

No Not Applicable

Staff provides briefing to the committee on the consequences of their recommendations.

What other actions has the agency taken as a result of the committee's advice or recommendation?

	Checked if Applies
Reorganized Priorities	
Reallocated resources	
Issued new regulation	
Proposed legislation	
Approved grants or other payments	
Other	

Action Comments

DOI does not have direct fishery harvest management authority for anadromous salmon. The KFMC provides recommendations to the Federal (Pacific Fishery Mangagement Council, and National Marine Fisheries Service) State (Calfironia and Oregon), and Tribal (Yurok and Hoopa Valley Tribes) governments and agencies that have that authority.

Is the Committee engaged in the review of applications for grants? No
