20a. How does the Committee accomplish its purpose?

The committee met once to review NASA's goals and objectives in aeronautics R&D. It also reviewed NASA's program structures, portfolio management approach as well as its partnership strategies to meet the agency's goals in aeronautics.

20b. How does the Committee balance its membership?

The committee was balanced in three parts. The

first part included key operators and users of the system: airlines, pilots, and cargo operators. The second included key research and development organizations: industry, academia, and other related federal government agencies. The third level included the public in terms of both passengers and neighbors to the national infrastructure. The third part was represented by a local Airport Authority which serves as a primary interface to the public and must operate, plan, & balance the needs of residents, travelers and operators on a daily basis.

20c. How frequent and relevant are the Committee Meetings?

Estimated Number of Meetings per Year - 4.
Unfortunately, due to scheduling conflicts for the co-chairs, only one meeting was actually conducted prior to termination of the committee.

20d. Why can't the advice or information this committee provides be obtained elsewhere?

This type of committee is necessary due to the size and complexity of the National Airspace System. Developing an effective agency strategy requires fitting into a national plan to modernize our air travel to meet the growth, safety, environment, and security requirements for today and the future. A plan on this scale requires broad and open public participation so that the planning can take into account the diverse requirements and issues involved in public air travel.

20e. Why is it necessary to close and/or partially closed committee meetings?

Not Applicable.

Narrative Description

The committee reviewed the Aeronautics R&D investment strategies that NASA had developed with its partners and investigated priorities and options on how to improve them. Given the complex nature of the National Air Space the committee brought together a broad set of representatives from industry, academia, and local & federal government to help fully flesh out the socio/economic implications of the investment/roadmap strategies.
